

KALTURA CAPTURE INSTALLATION INSTRUCTIONS

Accessing the download

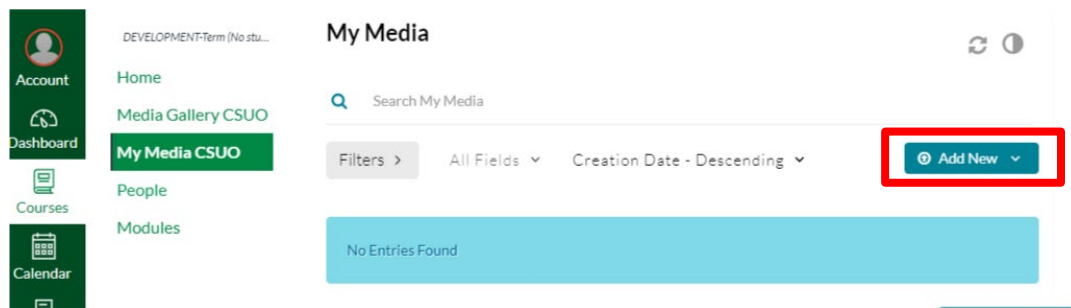

Click on the My Media CSUO link on the left side of the Canvas navigation bar.

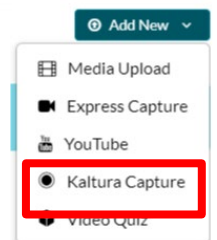

Authorize Kaltura to access your account.

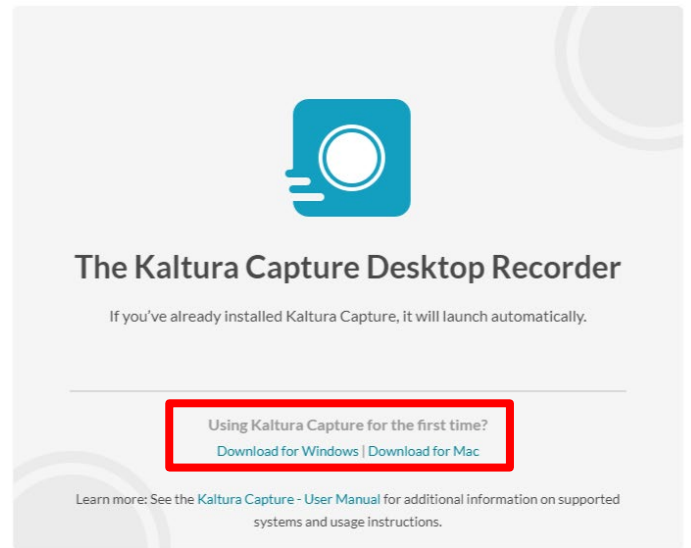

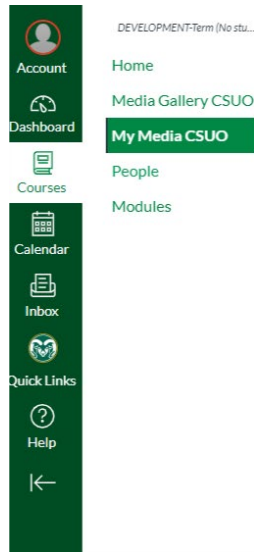

Click on Add New

Click on Kaltura Capture

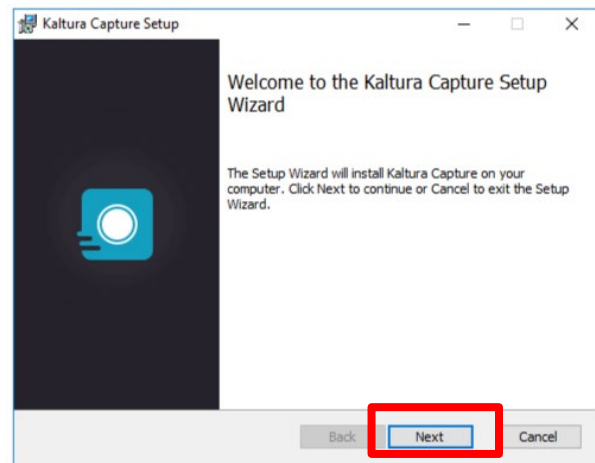

Download the Kaltura Capture Desktop Recorder

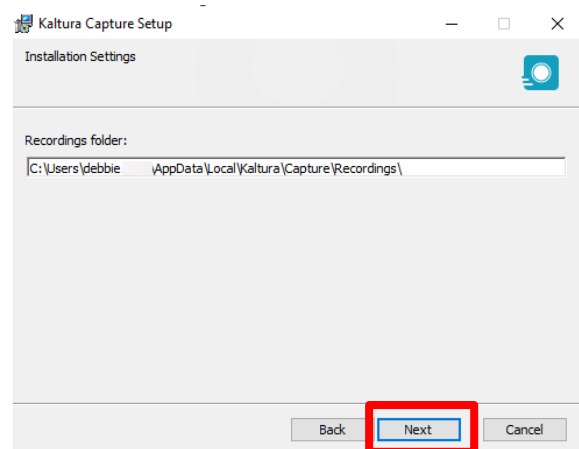

Installing the program

Double click on the file that downloads (likely called KalturaCapture_NNN.msi)

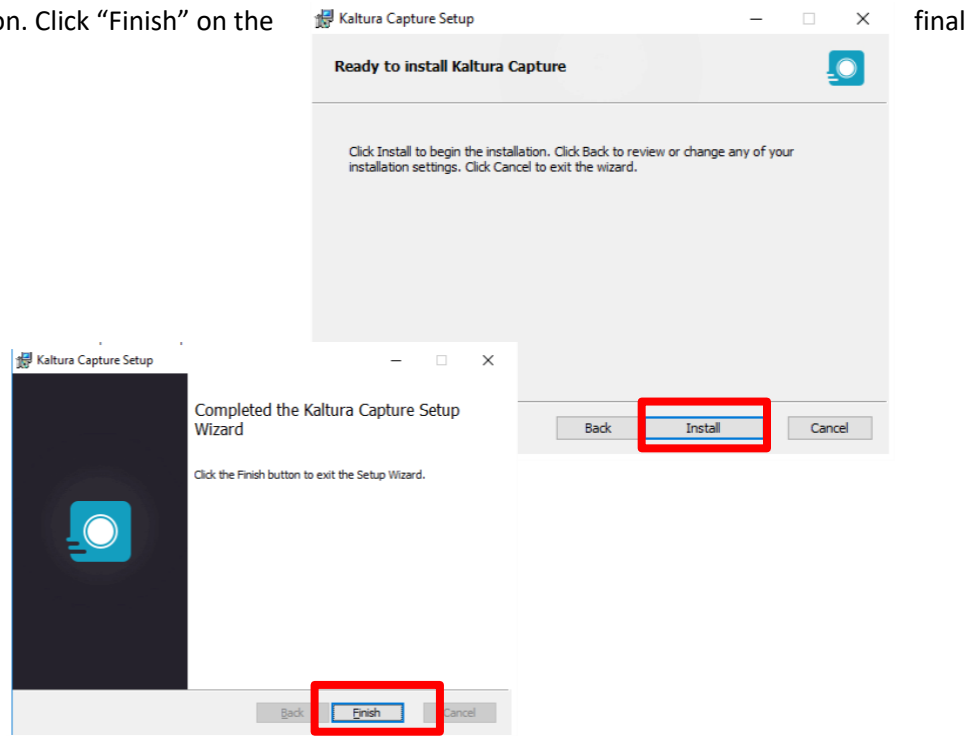

Click "Next" on the Welcome screen.

Click "Next" on the Installation Settings screen.

Click "Install" to begin the installation. Click "Finish" on the screen to complete.

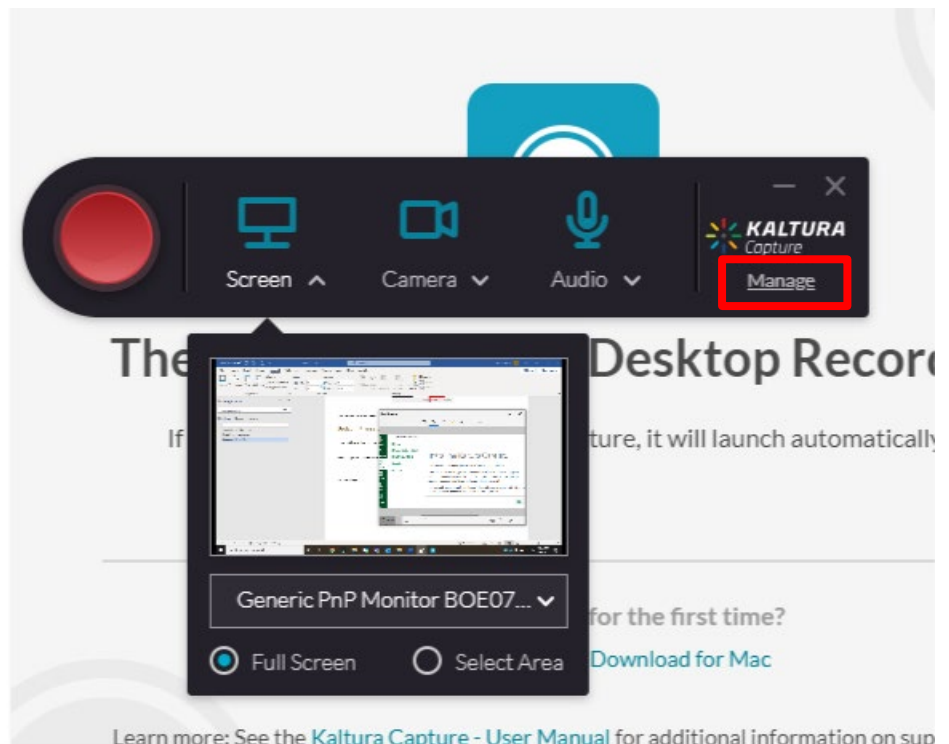

The Kaltura Capture Desktop Recorder software is installed.

Updating the settings

Head back into Canvas and go back into My Media CSUO and select "Add New"

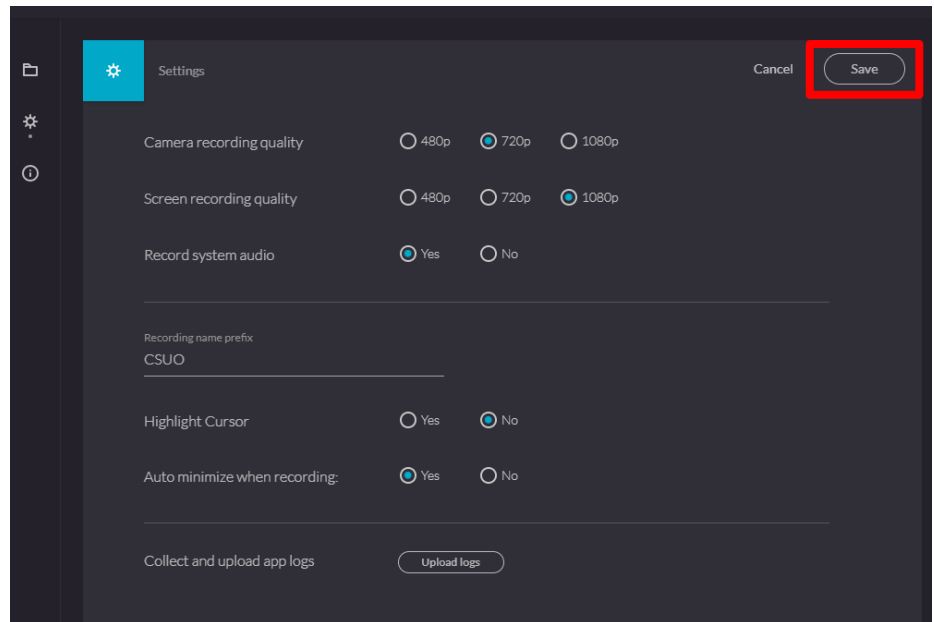

Select "Kaltura Capture" when prompted. The Kaltura Capture Recorder Opens.

Click Manage.

Click the gear icon to update the Settings AS DESIRED:

1. Camera quality = 720 p
2. Screen quality = 1080 p
3. Record system audio = No
 - a. This means clicks, dings, etc from your computer play. It may be desirable in certain circumstances.
4. Recording name prefix = consider adding your Course Prefix and # here (example AE 150) so that it is added to all your video content.
5. Highlight Cursor = No
 - a. This is used if you are demonstrating a process so that it is easier to follow your cursor
6. Auto minimize when recording = Yes
 - a. This removes the Kaltura Capture player from the screen so that if you film full screen, it is not visible.

Save these settings

Congratulations! You've set up the recording software.
